✳ **ACCESSBYTE SOLUTIONS**

CAPABILITY DECK

Document accessibility. Delivered thoughtfully.

A capability overview for accessibility-focused documents, website reviews, agencies and institutional content.

DIGITAL ACCESSIBILITY / DOCUMENT REMEDIATION / QUALITY REVIEW

What we focus on

Document accessibility is a usable-content workflow.

01 / PDF remediation

Structure trees, tags, tables, reading order and metadata.

02 / Office accessibility

Word, Excel, PowerPoint and forms.

03 / Web accessibility

Keyboard and screen-reader audit workflows.

Industry specialization

Diverse content. Meaningful review.

01 / Healthcare

SBCs, EOCs, provider directories, formularies, drug tiers.

02 / Public and enterprise

Reports, forms, policies and high-stakes documents.

03 / Publishers and agencies

Multilingual remediation and structured handoffs.

Quality framework

The four-step project process.

01 / 01 / Review

Receive sample content and gather standards, language and scope needs.

02 / 02 / Remediate

Review headings, tables, language, links, alternate text and order.

03 / 03 / Validate

Use Acrobat, PAC, JAWS, NVDA and manual checks as appropriate.

Standards and checks

Frameworks guide the scope, not empty badges.

01 / PDF/UA

Tagged PDF semantics, structure, order and navigability.

02 / WCAG / Section 508

Accessible documents and digital interfaces as applicable.

03 / Manual verification

Logical reading order, meaningful visual descriptions, contrast.

Talk through your requirements

Plan a document-accessibility engagement.

01 / Send sample content

A few representative pages are useful for scoping complexity.

02 / Confirm the project brief

File formats, volume, languages, deadlines and target criteria.

03 / Connect with us
