Digital accessibility and inclusive services

A concise overview of the AccessByteSolutions frontend service offering and working process.

Accessible documents

• PDF tagging, reading order, heading/list/table structure, alt text and navigation.

• Word, PowerPoint, Excel, forms, scanned documents and multilingual remediation.

• Quality assurance combines automated tools with meaningful manual checks.

Accessible websites

• Website accessibility audits, keyboard and screen-reader checks, semantic markup review and remediation guidance.

• WCAG 2.1/2.2, EN 301 549, Section 508 and other applicable frameworks inform project scope.

Additional support

• White-label accessibility services and localization workflows.

• Document data processing, annotation, spreadsheet support and accessible media/captions.

Working process

• Discovery: understand intended audience, file types and volume.

• Review: identify structure, navigation and usability issues.

• Remediation: fix prioritized issues in the appropriate authoring environment.

• Verification: check with manual testing, assistive technology and available validators.

• Handoff: share agreed deliverables and findings.

Project enquiry

• Use the contact page to prepare a request brief or open a pre-filled WhatsApp chat.

• WhatsApp number: +91 9773518152; messages are sent only after you confirm in WhatsApp.

To discuss your requirements: WhatsApp +91 9773518152. Actual scope and compliance obligations require project-specific review.
